Technical Skills

Languages Javascript, Typescript, Rust, Sql, Dart

Development React, NodeJs, NextJs, React Native, Flutter, VueJS, ExpressJS, MongoDB
Vite, PostgreSQL, esBuild, NestJs, GraphQL, Jest

Tools Docker, AWS, Git, Github-actions(CI/CD)

Experience

75way Technologies

Jun 2023 - Feb 2026

Software Development Executive

Fitness Coaching & Wellness Platform (*Next.js, React Native, Node.js, Express.js, MongoDB, Stripe*)

- Led end to end development of a fitness platform across web and mobile, building interfaces for client management, communities, workout planning, nutrition tracking, and progress monitoring.
- Developed the **Next.js web application** with interactive dashboards and workflows for coaches to manage clients, workouts, nutrition plans, communities, and health data.
- Built the **React Native mobile application**, integrating native health APIs and connected wearables to surface health, sleep, activity, and workout data.
- Integrated AI powered nutrition and workout experiences, including personalized plan recommendations.

Digital Mortgage Platform (*Vue.js, GraphQL, Node.js, NestJS, Microservices, Docker*)

- Developed multi tenant interfaces using **Vue.js** that allowed different types of clients to use tailored workflows while sharing the underlying platform.
- Created a shared session and seamless communication between multiple applications.
- Designed and developed interactive document management workflows for document handling, signatures, and document validation.

Sports Facility Booking & Matchmaking Platform (*Flutter, Ionic, Node.js, Express.js, PostgreSQL*)

- Led the **Ionic to Flutter migration**, achieving **55–70% faster performance** on mobile application.
- Built mobile experiences for facility discovery, team matchmaking, bookings, and player profiles.
- Optimized frontend state management, API usage, and caching, reducing backend load by **40%** and improving response times by **2x**.
- Developed interactive team matchmaking and player ranking experiences powered by weighted scoring and historical performance data.

Latest Personal Project

Nlite (*React v19, vite, Typescript, rolldown*)

[GitHub](#)

- Experimenting with React 19's new APIs to build a modern meta-framework architecture
- Working on core features: SSG, SSR with streaming, pre-rendering with RSC support
- Designing file-based routing system for simplified page management and api routes

Education

Bachelor of Science in Physics

2019 - 2022

University of Calicut

- Courseworks: Quantum Mechanics, Electrodynamics, Statistical Physics, Computational Physics
