MOHAMMED **SHAMIL**

Frontend Engineer · React, Next.js, React Native · ~2.5 years shipping product UI

shamilkotta99@gmail.com | shamilkotta.com | github/shamilkotta | linkedin/shamilkotta

Technical Skills

Languages	TypeScript, JavaScript, Rust, HTML, CSS, SQL
Frontend	React, Next.js, React Server Components, Vite, Vue.js, Nuxt, React Native, Expo
Backend	Node.js, Express, NestJS, GraphQL, PostgreSQL, MongoDB, Drizzle, Stripe
Tools	Git, Docker, GitHub Actions, Vercel, Cloudflare Workers, AWS, pnpm, Turborepo, esbuild

Experience

75way Technologies

Jun 2023 - Feb 2026

Software Development Executive · *Next.js, React Native, Vue.js, Flutter, Node.js*

- Led end to end development of a **fitness coaching platform**, building the **Next.js web app** with dashboards for coaches to manage clients, workouts, nutrition plans, communities and health data.
- Built the **React Native mobile app** for the same platform, integrating native health APIs and connected wearables to surface sleep, activity and workout data.
- Built AI powered nutrition and workout features, including image based nutrition analysis and personalised plan recommendations.
- Developed **multi tenant Vue.js interfaces** for a digital mortgage platform, giving each client type a tailored workflow on one shared platform, with shared sessions across multiple apps.
- Designed and built interactive document workflows for upload, signatures and validation.
- Led the **Ionic to Flutter migration** of a sports booking and matchmaking app, achieving **55-70% faster** app performance.
- Optimised client state, API usage and caching, cutting backend load by **40%**; built matchmaking, player ranking and booking flows.
- Built Shopify storefront features with merchant editable sections, metafields and Liquid snippets.

Projects

nlite *React, Vite, TypeScript, RSC* — *npm · GitHub*

- Wrote a lightweight **React framework** from scratch with app directory routing, layouts, loading and error UI, streaming SSR, SSG and **Partial Prerendering** in one route tree.
- Built **React Server Components** support on Vite through my own ESM bindings package, plus client navigation, a metadata API and MDX content. Published on npm (v0.10). Powers shamilkotta.com website
- Wrote a long form post, **Vite and React are all you need**, explaining React's own SSR, SSG, hydration and RSC APIs and why RSC needs a bundler.

LyzyOS *Next.js, TypeScript, AI agents, realtime sync* — *Live · GitHub*

- Agentic workbench where teams and an AI agent work side by side on a shared visual canvas, with realtime sync and a workspace per team or project stage.
- Built on Cloudflare Workers with the Agents SDK and Durable Objects, keeping canvas state in sync over WebSockets.

Open Source

- **npmx.dev** (3.6k stars, Nuxt/Vue): 10+ merged PRs, including a mobile menu accessibility fix, stale search response handling and an infinite stats loading fix.
- **@shamilkotta/rn-drag-resize**: published a draggable, resizable React Native component on Reanimated (v1.3), extending an existing library.

Education

Bachelor of Science (B.Sc) in Physics · *University of Calicut* — *2019 - 2022*
