Technical Skills

Languages Javascript, Typescript, Rust, Sql, Dart

Development React, NodeJs, NextJs, React Native, Flutter, VueJS, ExpressJS, MongoDB
Vite, PostgreSQL, esBuild, NestJs, GraphQL, Jest

Tools Docker, AWS, Git, Github-actions(CI/CD)

Experience

75way Technologies

Jun 2023 - Feb 2026

Software Development Executive

Fitness Coaching & Wellness Platform (*Next.js, React Native, Node.js, Express.js, MongoDB, Stripe*)

- **Led end to end development** of a fitness platform connecting fitness coaches and clients.
- Built **Node.js/Express APIs** and the **Next.js web platform**, enabling client, workout, nutrition, community, health, and payment management with Stripe.
- Built the **React Native mobile application**, integrating native health APIs and connected wearables to collect health, sleep, activity, and workout data.
- Integrated **AI-powered nutrition and fitness workflows**, including image-based nutrition analysis and personalized workout and nutrition recommendations.

Digital Mortgage Platform (*Node.js, NestJS, Microservices, Docker, GraphQL, Vue.js*)

- Built and optimized high volume **microservices and Vue.js web applications** supporting multiple client types within a multi tenant financial platform.
- Reduced CPU overhead by **3%** through performance critical algorithm optimizations and improved event driven service throughput by resolving resource contention bottlenecks.
- Reduced manual processing time by **40–50%** by implementing an automated job scheduler.
- Built cross-functional web apps with shared sessions and seamless communication across applications.
- Designed interactive workflows covering document management, signatures, and document validation.

Sports Facility Booking & Matchmaking Platform (*Node.js, Express.js, PostgreSQL, Ionic, Flutter*)

- Developed end-to-end features for **facility booking, matchmaking, player rankings, and checkout**.
- Increased successful team matches by **95%** through weighted scoring and performance based rankings.
- Led the **Ionic to Flutter migration**, achieving **55–70% faster performance**, while reducing backend load by **40%** through API batching, caching, and state optimization.
- Integrated third party payments and group payment splitting, reducing payment failures by **50%**

Latest Personal Project

Nlite

[GitHub](#)

React v19, vite, Typescript, rolldown

- Experimenting with React 19's new APIs to build a modern meta-framework architecture
- Working on core features: SSG, SSR with streaming, pre-rendering with RSC support
- Designing file-based routing system for simplified page management and api routes

Education

Bachelor of Science (B.Sc) in Physics

2019 - 2022

University of Calicut

- Courseworks: Quantum Mechanics, Electrodynamics, Statistical Physics, Computational Physics
